Dominican Republic

Is located in the heart of the Caribbean, where the waters of the Atlantic Ocean bathes the Northern part of the island; to the East the Mona Passage separates us from Puerto Rico; on the West side we share the island with Haiti; and the warmth and the tonalities of blues of the Caribbean Sea shine at the South.

With a total of 32 provinces and a National District with its capital Santo Domingo, our island has 48,484 square kilometers making it the second largest in the Caribbean Region.

The first days / Cradle of the New World

The island was inhabited by "Tainos" ethnic group whose way of life was based on hunting, fishing and collecting fruits, developing a culture around these activities, until the moment in which happened what history calls "the encounter of two cultures": the arrival in this land of the Spaniards conquerors under the command of Admiral Christopher Columbus on December 5, 1942.

In his diary, the Admiral described this land as: "the most beautiful land that human eyes have ever seen". He called it "La Hispaniola" and from here Spaniards went to conquer the so called "New World".

The first European colony was established in these lands and in its capital Santo Domingo, called Primacy of the Americas; where the first cultural and social institutions of the new world were originated, the first fortresses, the first churches, the first cathedral, first hospital, the first monuments and the first university of the Americas.

During the colonial time three races cohabited: indigenous or "Tainos", Spaniards and Africans, whose miscegenation left considerable legacies to the national culture that over time acquired appropriate character.

Until the latest XVI century the Hispaniola Island kept the interest of the Spanish Colony for the benefits generated by its natural resources and the system of sugar plantations.

Other Historical Notes

For many years our territory remained under foreign domination, both from Spain and Haiti, until February 27, 1944 when independence that freed us from the Haitians is proclaimed, in a quest led by Juan Pablo Duarte and a group of heroes where Francisco del Rosario Sánchez and Matías Ramón Mella played an important role, they are considered the "Founding Fathers".

After several years the Dominican Republic was again annexed to Spain until August 16, 1863, when the courageous Gregorio Luperón fought the Restoration war to return Dominican sovereignty.

Various events of great magnitude have occurred in our lives that have left great impact and unforgettable lasting social and political remnants, such as the painful Rafael L. Trujillo dictatorship (1930-1961) and the civil war of April 1965, it was just from 1965 when the country began to do its first steps of freedom and

Why hire a tour operator from OPETUR?

To feel the safety of a good backup that provides the effective and essential assistance at the needed time is only possible hiring the services and excursions with a tour operator legally renowned and prepared.

Therefore we suggest that if you decide to participate in the different excursions that we present you direct yourself to the tour desk in your hotel and buy only those offered by its representative. The main reasons we recommend the services of a tour operator associated to OPETUR are:

Assurance

When you buy your excursion to the representative of your tour operator immediately you have full assurance that you will receive the contracted services. Should you wish to cancel the tour, money would be refunded without any problem. Likewise, if problems are encountered during the trip, the representative will seek for solutions.

Safety

We have a highly skilled and trained team to preserve the integrity of our visitors, both on the road, on each activity, and until your final destination, as your wellbeing is our first priority.

The vehicles used, the guides and services offered in each of the tours, have the proper operation permits granted by the Ministry of Tourism

of the Dominican Republic.

In addition, the receptive operators' members of OPETUR are companies that by law have a statutory liability insurance to cover any eventuality that may arise.

Confidence

The receptive tour operators are also who are representing the company, the travel agent or the wholesaler from which you bought your holiday.

The travel agency or the wholesaler in your country works directly and relays on the Dominican receptive, so the representative is the liaison whom you should trust to ask any questions, buy your excursions or simply obtain the information you need.

Do not be Deceived

False desk agents or vendors that roam the beaches and around hotels and resorts do not have the proper license to operate despite having ID's, therefore don't let yourself be abused, cheated or have an unpleasant time, and don't get any service they try to sale you.

BASEBALL Route

Baseball or “la pelota” as this sport has been named by the national culture, is one of the great passions and favorite pastimes of Dominicans, arousing great joy and enthusiasm in fans that really enjoy the “king sport” in which on each winter season six teams compete for the glory of the victory, that starts in mid October and ends in January.

The baseball history is as old as varied are the theories describing its origin, among them the one that specified that in 1891 baseball began in Santo Domingo; another one indicates that by 1886 already the game was played in “San Pedro de Macorís” and another says that it arrived in the Dominican Republic with the U.S. occupation of 1916.

The truth is that the first teams that we have knowledge were “Ozama” and “Nuevo Club” as well as “Licey” which was formed in 1907 to confront the first two, which later disappeared.

By 1923 was held the first official championship between teams representing Santo Domingo, Santiago and San Pedro de Macoris. In 1936 was organized the first national baseball tournament with teams “Licey”; “Escogido”, “Estrellas Orientales” and “Sandino” which later changed its name to “Águilas Cibaenas”.

In 1955 was inaugurated the first baseball park with a lighting system: “El Estadio Quisqueya” which

marked the beginning of modernity of the sport and its entrance to the organized baseball.

Dominican baseball has leading figures that have excel with great merits in the Major Leagues: Felipe Rojas Alou, Tony Peña, George Bell, César Cedeño, Ricardo Carty, Juan Marichal, Julio Franco, Moisés Alou, Pedro Martínez, David Ortiz, Sammy Sosa, Albert Pujols, Manny Ramírez, Vladimir Guerrero, Julián Javier, Alex Rodriguez and many, many more.
